

## INTELLIGENCE FOR THE PHYSICAL WORLD

# Technical architecture

A public overview of shared intelligence and bounded authority. Operational secrets are excluded.

PUBLIC EVIDENCE BRIEF / AS OF 2026-10-13

## Source layer

Licensed telemetry, observations, documents and operator inputs retain provenance and dates.

## Evidence layer

Tenant identity, context, rule versions and source references support explanations and reviewed outputs.

## Intelligence layer

AI assists interpretation; deterministic rules and approved scope constrain operational tools.

## Delivery layer

Dashboards, reports, scoped APIs and reviewed agents expose product-specific functions and current readiness.

## Trust layer

Off-chain protected content, signed audit and independent hash commitments support verification.

## Release and continuity

Protected CI/CD and evidence lineage support controlled releases. Local continuity is implemented; production recovery remains incomplete.

## Evidence and provenance

Finalized Base registry activity snapshot | 2026-10-13 | Pinned code and finalized block independently checked  
<https://basescan.org/address/0x9bB168713f5CF5d53320F70930CD9c0EF3252273>

RALE identity and platform separation | 2026-10-13 | Owner-directed product positioning

Continuity operability and recovery evidence | 2026-10-13 | Local validated control plane; sandbox drill; production recovery not proved
