

INTELLIGENCE FOR THE PHYSICAL WORLD

Create

Create has a public product surface and source implementations for scoped generation, review and asset delivery. Current production fulfillment, provider activation, paid acceptance and margins have not been independently established for this investor library.

PUBLIC EVIDENCE BRIEF / AS OF 2026-10-13

Problem

Teams need a reliable path from brief to approved media and deliverables.

Product

Scoped creative jobs, review and asset delivery; the internal campaign pipeline reuses approved PhoenixAI assets.

Live state

Public surface observed and source delivery contracts implemented; current fulfillment acceptance unverified.

Customer evidence

No current paid Create acceptance receipt cleared for this investor library.

PRODUCT / EXPANSION / EVIDENCE

The path to scale.

Data moat

Approved asset libraries, provenance and accepted delivery history; customer rights remain scoped.

AI role

Generate drafts and prepare assets; authority over publishing and commercial execution remains separate.

Commercial model

Proposed paid creative work and service access; actual pricing and margins undisclosed.

Expansion path

Prove provider/job delivery, rights, customer acceptance and repeat-order economics.
