

INTELLIGENCE FOR THE PHYSICAL WORLD

Security / disaster recovery

Clear evidence boundaries are part of investor assurance.

PUBLIC EVIDENCE BRIEF / AS OF 2026-10-13

Implemented local controls

Identity binding, fresh passkey checks, independent quorum, task-scoped expiry/revocation, signed audit and encrypted sandbox records.

Data boundaries

No credentials, recovery factors, beneficiary information or private operational content is published or stored on-chain.

Continuity drill

Eight isolated sandbox/simulation checks passed. Synthetic authentication in drill execution is labelled; real passkey browser checks are separate.

Unverified production recovery

AIS/Elasticsearch restore, off-host recovery and production RPO/RTO are not proved. Backup existence alone is not restore evidence.

Independent review

Independent security audit and witnessed production continuity acceptance are not completed.

Next evidence gates

Real enrollment, professional/legal authority, scoped production sources, finalized continuity anchor receipts, isolated data restore and protected staging/release validation.

Evidence and provenance

Continuity operability and recovery evidence | 2026-10-13 | Local validated control plane; sandbox drill; production recovery not proved
